TIMES HIGHER EDUCATION ASIA UNIVERSITY RANKINGS

Times Higher Education Asia University Ranking 2018 has declared University of Agriculture, Faisalabad (UAF) as 88th best Asian University on the basis of its subject Agriculture and Forestry. In Asian Universities (overall category), it is standing at 251 position. The Times Higher Education World Universities Ranking has placed UAF at 802nd position across the globe while in the field of Agriculture and Forestry, it has gained the 160th position worldwide. Five universities from Pakistan participated in agriculture and forestry category in which UAF is at the top in research. The Asia University Ranking used 13 performance indicators to provide the most comprehensive and balanced comparisons. The performance indicators are grouped into five years: Teaching (25%), Research (30%), International look (7.5%) and Industry income (7.5%).

During discussion on the recent ranking, the committee of the Deans in its recent meeting recorded its appreciation to whole University community for making improvement in the University rankings. The Vice Chancellor desired the Director ORIC to convey his pleasure and heartiest congratulations to the faculty members on this achievement. The committee concluded that UAF is at the top in Research but lacking in citations and International outlook. The committee of the Deans noted that the research influence indicator "Citations" examine the role of Universities in spreading new knowledge and idea. This year, bibliometric data supplier Elsevier examined almost 62 million citations to more than 12.4 million journal articles, article reviews, conference proceedings and books and book chapters published over five years. The data include the 23,000 academic journals indexed by Elsevier's Scopus database and all indexed publications between 2012 and 2016. Citations to these publications made in the six years from 2012 to 2017 are also collected. The international outlook indicator examines the ability of a university to attract undergraduates, postgraduates and faculty from all over the planet. The International Indicator calculates the proportion of a university's total research journal publications that have at least one international co-author and reward higher volumes. The committee of Deans in order to further improve the number of University's international ranking decided that the Deans, Directors, Principals UAF Sub Campuses and Chairmen of Teaching Departments must hold meetings to sensitize the faculty members to generate new ideas and share their knowledge around the global scholarly community to expand the boundaries of other's understanding, irrespective of discipline. Each faculty members must have atleast one international co-author in each publication. Research papers of faculty members should be invited at UAF for atleast one semester every year to get benefit from their expertise and to increase percentage of International outlook. The teaching components must identify the international faculty relating to their respective disciplines for hiring under foreign faculty hiring program. There is a significant part of the Faculty of Sciences in ranking under parameter of citation index. The Dean Faculty of Sciences should hold a special meeting of Teaching Departments of his Faculty to motivate to play vital role to maintain/further enhance the citation index of the University.
