ESTABLISHMENT OF FULBRIGHT OFFICE AT UAF

USEFP is bi-national commission established since 1951 to help promote mutual understanding through educational exchange of outstanding scholars, professionals, and students between Pakistan and the US. USEFP's program department offers 13 different fully funded scholarship program for students, professors, teachers, working professionals and journalists. The Fulbright Masters and PhD

program funds graduate study in the US for a Master's or PhD degree. Funded by the USAID, these grants cover tuition, required textbooks, airfare, a living stipend, and health insurance. USEFP also assists with the visa process. Operating in Pakistan for more than two decades, USEFP's testing services have expanded operations in recent years from Islamabad to Lahore and Karachi. Students may register their USEFP for the TOEFL, GRE, SAT, or ACT examinations and many more such standardized tests or professional certifications. This is to inform you that a USEFP Fulbright office has been established in FM Radio Building opposite to CDC at UAF aiming at guiding the students and faculty about scholarship and training opportunities from Monday to Friday (9.00 am to 5.00 pm). For information and other details please contact Mr. Zain Irfan at 0300-852-9890 or send your email at zain@usefpakistan.org.

INFORMATION TECHNOLOGY RESOURCE CENTRE & DATA BANK (ITRCDB)

**Principal Officer ITRCDB: Prof. Dr. Muhammad Jalal Arif
Contact No. 0322-7641232**

Here, as Principal Officer ITRCDB, I do want to put on record that under the visionary and blazing leadership of Prof. Dr. Iqar Ahmad Khan (SI), our data network team has extended their services providing 24 hour internet connectivity without any break to the university community and accredited their competency using existing resources. Now boosting up the IT assistance, network team has designed a framework stratagem of self-managed employees account to update their status on website. Our IT professionals remain all time available to support and guide the researchers, students and academic/non-academic staffs to pilot their efficiency and exertion. All world ranking agencies accumulate data from the websites and recently the UAF has been ranked by NTU Rankings in agricultural sciences at 33rd position in the Asia Pacific region and at 158th position in the world. The HEC has rated UAF at the top position for research output among 140 universities in the country. We are planning to put great emphasize on dissemination of research output that is being produced faster than ever and its translation into goods and services and timely updated on university website. Now a days we are working hard to get the place in QS world ranking, a high profile ranking agency for universities on world level, and updating & developing new modules. UAF Initiative on Internet and Society is a step into exploring, understanding and trying to comprehend cyberspace and get solution of the problems. We have recently established the cross-university interdisciplinary Research Initiative on Internet and Society. We are exploring the development of cyberspace, to facilitate its study, to better understand its relationships to business, technological, economic, social, legal and other dimensions of the university community. Going forward, the immediate focus will be on the content itself. We will identify other content areas besides internet connectivity that can help to expand innovative research and solutions to the end users. We will also develop protocols for evaluation of the program itself. This includes designing instruments to measure learning over time as well as indicators for student engagement and other such factors that contribute to the overall success of the program. We're open to collaborating with people who can help us develop the content as well as scale up the program itself. Network and software development are the two components of the program that have taken following initiatives to facilitate the community.

**NETWORK SECTION (Focal Person: Mr. Wasi Ahmad,
Network Administrator Contact 0300-6603260 Phone

Information Technology has become everyday need. Teaching Research without IT services cannot be imagined anymore. At UAF the main effort to provide such services was through a project "Campus-wide Networking and Computerization of University of Agriculture, Faisalabad by using Fiber Optics" which was completed in 2004. It supported to 400 nodes of Network which has increased to 1500 nodes in 2008 and the existing infrastructure could not support the increasing demand of Network and software as many integrated modules of Management Information system and Dynamic Website of the university has already been developed. Under another project entitled "Strengthening of Educational & Research Facilities at U.A. Faisalabad", student hostels were connected to the existing server room, it is expected that it will further overburdened the existing facilities. Consequently "Up gradation/Strengthening of I.T Infrastructure" was launched under the mega project for expansion and up gradation of internet, web and software facilities to entertain in reliable manners at UAF. A new well equipped Data Centre has been developed. Previous hardware has been updated in the Main and Old campuses and all the student's hostels have been provided with a wireless facility as well. To provide IT services in lucrative manners a separate

center named information Technology Resource Center and Data Bank (ITRCDB) was established in December 2010. Under the supervision of Principal Officer it has expanded its domain to meet global standards in the prospective of education and research. The ITRCDB consists of highly qualified team which is self-motivated. They remain on-board to environment around the clock to faculty students and other stakeholders at their threshold. The Data Center of ITRCD is equipped with latest software and hardware resources like Core Switches (CISCO catalyst switch 6506 CISCO Switch 4507), Wireless Controller CISCO 4402 with IPS, Adaptive Security Appliance CISCO 5520 with Firewall, Anti-x & IPsec VPN, IBM's series Blade servers with 5.8 TB SAN, Dell Power Edge and HP ML 370 G4 servers, and software Resources Windows server 2008, Windows server 2008 R2, REDHA Linux 5 enterprise edition, ORACLE 9i Microsoft Office Communicator server etc. This well-equipped data center is distributing 192MB bandwidth to the whole campus and hostel area as it is connected with Pakistan Education Research Network 2. The distribution network is comprised of distributing switches of CISCO catalyst 3560 which are providing connectivity to Access layer switches (CISCO Catalyst 3960, 2950 and 520) and CISCO Light Weight Access Point 1242 series through UTP and Core medium Fiber Optic. The Data Center is providing 192 Mbps real-time Internet connectivity to all departments including the hostels of students and faculty affiliates.

I.T.R.C.D.B is also contributing in the progress of University by means of providing 24-hour high speed controlled Internet access throughout campus, Network and system support services, Hardware repairing and maintenance services, Web and e-mail services, Digital Library and E-brary access, MSDNAA Program for all students and Faculty members, Video conferencing services, IP Telephony services, Resource sharing over the LAN infrastructure, Data backup and archiving, Network extensions for existing and new departments in the campus, and Technical assistance for procurement of IT related equipment and services

Network enhancements in pipeline

Center is planning to provide high speed internet facility to Motor Pool, ITBMS and PARS Campus. To equip the community with original windows and other software like MS Office, Anti Virus and other productivity software for project planning and design and to develop alternate WiFi link throughout the campus to provide 24/7 uninterrupted internet facility.

SOFTWARE SECTION (Focal Person: Mr. Qamar Nawaz, Web Developer contact 0334-9669696 Ph. # 9200161-170 # 3328)

Information Technology Resource Center and Data bank has also developed and implemented Management information System for UAF which is comprised of:

Library and Book Bank Information

This is feature rich library management software developed in house to facilitate computerized books record, provide search facility of book, journals and thesis to community, and track issuance records of books. This software has also support of Urdu language to facilitate operators.

Admissions and Enrollment Management for undergraduate and postgraduate

This software is playing a core role in the admissions to record data of all incoming and existing students. This software is also capable of calculating merit lists automatically according to the rules. For last 5 years, admission process is being facilitated by this software.

Controller of Examination office is also equipped with in house developed software which is capable of generating DMCS, Degrees, Award list generation and management, subject enrollments of all postgraduate and undergraduate students and result lists generation.

Directorate of Students Affairs Information System for students/staff is facilitating to generate and print identity cards.

Student Record Branch Information System

Undergraduate and Postgraduate Fee Management System is also a major software which is capable of keep track of all fees paid by students in each semester. Fee slips are being generated by using this software automatically for last few years. This software is providing financial management assistance of funds to the treasurer office.

The Centre is also administrating the following websites.

University website www.uaf.edu.pk which is the richest source of comprehensive and up-to-date information about the campus' life, research, academic activities, academic calendar, documentaries, photo galleries and publications. The university website is also facilitating the student, staff and faculty by providing web based catalog interface for Central Library of UAF the end users can search Books, theses and journals effectively & efficiently and also download soft copies of them.

www.library.uaf.edu.pk is providing web based interface of library management software to provide information of book, thesis and journals available at library online. Students and employees can access this information without visiting library.

A web based forum for current student and alumni www.uaf.edu.pk/alumni has also been developed and managed by the center. It develops a social network of Old and New students and become the centralized platform for current students as well as alumni of UAF to keep in touch with each other. Students/alumni can chat, send email, post jobs and can

share old memories with each other by adding other students in their friends list.

Online employees repository and papers repository also has been developed and managed by this center. These repositories are providing all information about employees and publication so far. www.icdd.uaf.edu.pk is another website managed by the center. Web section is also managing employees official email system which is hosted on Google servers known for unbreakable security and identity theft protection. Employees are encouraged to get their official email IDs to let them communicate with outer world with their official identities.

FTP server, DNS server and in house web servers are being managed by software development section at local data center.

Software enhancements in pipeline

Center is working on renewing official website with new and easy to access look and feel with many new features and modules.

Self-managed employees account would be available on website to each employee where they can upload/update their profile information, CV, list of publications, list of books, list of projects, list of supervised students and other related information.

Categorized news and events web based module will be available soon which will provide events information categorized by event types and dates.

Integrated software module to exchange information between Fees, admissions and result software is being developed which will provide single entry record management of each student.
