CHALLENGES IN INTERNATIONAL ENTOMOLOGY

American Scientist Dr. Mark. S. Hoddle while delivering a special lecture on "Challenges of International Plant Protection" said that California (USA) has 70% similar climatic nature like Punjab Pakistan that is why he had initiated International research on both hazardous insects. He said that Citrus Psyllid destroying California Citrus Orchards had similar nature and gene persisted in Pakistan. He maintained that RPW was causing destruction to Date Palm Orchards in South East Asia (SEA), Middle East, South Africa & other regions of the Globe. Dr. Hoddle stressed the need for Biological control methodology for controlling both pests. UAF VC Prof. Dr. Iqar Ahmad Khan as chief guest appreciated the work done by US scientist, said Kinnow is actually originated at California (USA) but succeeded to produce maximum yield potential at Central Punjab (Pakistan) with aroma, color & unique taste, and saved Pakistani's from Blindness due to having lot of Vitamins. He said that unfortunately this wonderful fruit had been suffering from Citrus Psyllid and Greening Disease which was causing death a fresh tree within span of 5-8 years. Prof. Dr. Muhammad Jalal Arif, Chairman Department of Entomology while highlighting the role of his Department said that domestic pest control solution, grain storage management and plant diagnostic advisory services were being extended to the community and a mobile health clinic had been established to extend services at the door step of farmer community. He maintained that Cyber Extension services would also be initiated very soon. A large number of faculty members and students attend the lecture.
